

German Statistical Society
Statistical Week
September 10 - 13, 2019
University of Trier

Main Topics:

Data Journalism

Environmental Statistics

Microsimulations - Applications and Methods

Housing

Gumbel Lecture: Axel Bücher

Heinz-Grohmann Lecture: Bernd Fitzenberger

Young-Academics Mini-Symposium:

Philipp Otto: „Models for Spatial and Spatiotemporal Data“

During the statistical week all committees of the German Statistical Society offer Sessions, particularly to the following topics:

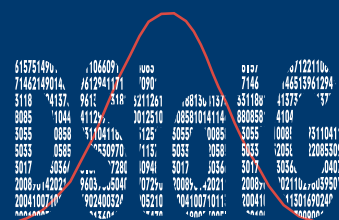

Bayesian Analysis in Natural and Social Science (Special Topic)
Econometrics of Networks (Empirical Economics)
Development of Indicators for Monitoring, Control and Evaluation (Education and Training)
Research, Education, Innovation (Business and Market Statistics)
Functional Time Series (Statistical Theory and Methods)
High-Dimensional Statistics for Structural Analysis (Statistics in Natural Science and Technology)
Interpretable Machine Learning (Computational Statistics and Data Analysis)
Regional Disparities (Regional Statistics)
Small Area Estimation (Methodology of Statistical Surveys)
Statistical Learning in Finance (Statistics in Finance)
Statistical Literacy
Survey Statistics (Joint Session SIS)

Tutorial: Small Area Estimation with R (P. Burgard)

The German Statistical Week is jointly organized with the "Association of German Municipal Statisticians" and the "German Society for Demographics".

Participants intending to give a talk or to present a poster are invited to submit an abstract electronically via the conference submission system. The submitted abstracts will undergo a reviewing process.

The German Statistical Society supplies a limited amount of grants covering travelling costs for members younger than 35. Details can be found on the Societies homepage.
